TITAN EXPERT PRO

PATCH VIEW

New and easy way to patch, edit and manage your fixtures. Quick to exchange and readdress large numbers of fixtures – ideal for touring shows.

AUTOLEGEND

Palettes are now intelligently labelled for you – colours, text and CIPF thumbnail images make building your show quicker than ever before.

MOVE IN DARK AND TRACKING

Easily create complex cue lists with the help of extensive move in dark and tracking options. See exactly what each step contains using the shape and pixel map views. Edit values directly from cue view, and set fade times over the whole cue, attribute groups or individual channels.

QUICKSKETCH IN PIXEL MAPPER

Avo's unique Quicksketch tool can now be used in Pixel Mapper – instantly create and animate custom content over any fixtures you like. Also use Avolites unique drawing tool to easily create icons that are fast to find during showtime.

Also New In Titan Version 6

TEXT IN PIXEL MAPPER

Add an extra touch to your show with animated text – choose from a selection of fonts, including Windings.

MASTERS

Assignable Rate and BPM Masters let you sync chases, shapes and pixel maps for a perfectly timed show. Preset, Playback, Swap, Flash and Grand Masters are also assignable – letting you set up your desk the way you want.

LOADING SCREEN

See the status of your show and check the progress when it is updating to a new version of software.
