

Frequently Asked Questions

FAQ 10020 - How do I move a show file from floppy disk to USB stick on a PC?

1. Copy the files mempool.sys and avo.sys from the floppy disk to the root folder of the USB stick. (The root folder will look something like e:\)
2. Download "Copy2008.zip" from here
<http://www.avolitesdownload.com/Software/Release/Pearl2008andTiger/Copy2008.zip>
3. Unzip Copy2008.zip and extract the file copy2008.exe to the root folder on the USB memory stick
4. Run "Copy2008" by browsing to the USB memory stick and double clicking on "Copy2008"
